

DEPARTMENT OF THE NAVY  
OFFICE OF THE ASSISTANT SECRETARY  
(ENERGY, INSTALLATIONS AND ENVIRONMENT)  
1000 NAVY PENTAGON  
WASHINGTON, D.C. 20350-1000

May 11, 2016

Dr. Mary Abrams  
Field Supervisor, Pacific Islands Fish and Wildlife Office  
U.S. Fish and Wildlife Service  
Department of the Interior  
300 Ala Moana Boulevard Room 3-122 Box 50088  
Honolulu, Hawaii 96850

Dear Dr. Abrams:

As you requested during our phone conversation on May 9, 2016, enclosed is the Department of Navy's concise summaries of the Marine Corps Relocation proposed action and all conservation measures for the *Tuberolabium guamense* and *Hypolimnys octocula marianensis* (Mariana eight-spot butterfly). The proposed action and conservation measures have evolved through the formal conference and subsequent formal consultation period from March 10, 2015 to present. The enclosed documents are in the format that you requested..

As we also discussed during our phone conversation, these summaries formalize the information required by the FWS to complete the biological opinion for the Marine Corps Relocation to Guam. I ask that you provide a timeline for completion of the biological opinion to me via email no later than May 13, 2015.

We appreciate your assistance in expeditiously concluding the consultation. Our technical point of contact is Ms. Coralie Cobb, Naval Facilities Engineering Command, Southwest. For technical questions, please contact her at (720) 542-3085 or email at (b) (6)

Sincerely,

Joseph A. Campbell  
Captain, U.S. Navy

- Enclosures: 1. Consolidated summary of conservation measures for *Tuberolabium guamense*  
2. Consolidated summary of conservation measures for Mariana eight-spot butterfly
